I am respectfully,

EDWIN S. STUART,

Mayor.

—

DEPARTMENT OF PUBLIC WORKS.

Philadelphia, April 12, 1892.

HON. EDWIN S. STUART,

Mayor of Philadelphia.

DEAR SIR:—The City Controller, in closing the books for the year 1891, merged the balance to the credit of Item 9½, extensions, Bureau of Water, amount \$239,921.11. This money was from a loan, and the Department contemplated using it during the year 1892, as follows:

J. B. Reilly, (contract executed) for the completion of the Roxborough reservoir.....	\$149,000 00
New pumping engine at Shawmont pumping station.....	72,000 00
Engineering expenses on Roxborough reservoir..	11,000 00
Engine-house at Spring Garden pumping station,	7,921 11
Total.....	\$239,921 11

The item for extensions, in the appropriation for 1892, (Bureau of Water), \$550,000.00, is insufficient to meet the requirements of the work contemplated by the Bureau of Water this year, and the above amount, \$239,921.11, which was merged by the City Controller on December 31, 1891, should be returned to this Department.

I have the honor to request that you will ask Councils to reinstate, by appropriation, this amount, viz: \$239,921.11.

In this connection I would also state that the following work is necessary and should be done:

First.—To secure a proper supply and distribution to the lower part of the city, below Vine street, and between the Delaware and Schuylkill rivers, a 48-inch supply main from the East Park reservoir to Broad and South streets, should be immediately laid; estimated cost..... \$324,000 00

Second.—As there is but one pumping main from Frankford Station to the Wentz Farm reservoir, a second main should be immediately laid; accident to the present main may deprive Frankford and the adjacent districts of a supply of water; estimated cost..... 225,000 00

Third.—Addition to engine-house at Frankford Station is a necessity. The present condition of the engines at this station will not permit either of them to be dispensed with, to give place and location for the proposed new pumping engine; the additional boilers required also necessitate additional space; estimated cost..... 30,000 00

Total..... \$579,000 00

If money should become available, it is very essential that this work should be done.

Yours very respectfully,

JAS. H. WINDRIM,

Director.

APPENDIX No. 8.

OFFICE OF THE MAYOR.

Philadelphia, April 14, 1892.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—I have the honor to herewith transmit for your consideration a communication, which has my unqualified approval, from James H. Windrim, Director of the Department of Public Works, relative to the subject of the repaving by the Philadelphia Passenger Railway Companies of the streets they occupy.

The Supreme Court of the Commonwealth of Pennsylvania handed down a decision in October last, confirming the opinion of the lower Court, declaring that Passenger Railway Companies within the City of Philadelphia, must repave with improved pavements from curb to curb the streets they occupy.

Since that time, Director Windrim and myself have had several conferences with the Committee of the Board of Presidents representing the Passenger Railway Companies of Philadelphia, in the hope that a general plan under which this work should be performed might be adopted, but we have been unable to arrive at an understanding and agree upon any plan which I could recommend that your Honorable Bodies accept.

In the years 1890, 1891, and 1892 the City appropriated for the repaving of streets not occupied by Passenger Railway Companies a total sum of one million one hundred and seventy-two thousand five hundred and fifty-two (1,172,552) dollars and twenty-four (24) cents. During the year 1889 and 1890 the City expended a total sum of four hundred and forty-five thousand five hundred and one (445,501) dollars and eighty-three (83) cents for repaving the streets which were occupied by the Passenger Railway Companies. Under the above decision of the Supreme Court this latter sum is to be reimbursed to the City by these corporations. If in addition to this reimbursement these railway companies also performed this year the work recommended in the accompanying communications, they will still have expended two hundred and

forty-seven thousand seven hundred and one (247,701) dollars and nine (9) cents less than has already been appropriated by the City during the same time for the repaving of streets not occupied by them, leaving them still behind the City and not in pace with her in these improvements. In view of the fact that the City has during the past three years appropriated for the improvement of her highways over one million (1,000,000) dollars, and in addition has expended nearly one-half of a million dollars yet to be reimbursed her by these companies, I deem the recommendations as contained in the accompanying communication but fair, just, and reasonable, and respectfully request that they receive the favorable consideration of your Honorable Bodies.

I am, respectfully,

EDWIN S. STUART,

Mayor.

—

DEPARTMENT OF PUBLIC WORKS.

Philadelphia, April 5, 1892.

HON. EDWIN S. STUART,

Mayor of Philadelphia.

DEAR SIR:—In considering the matter of repaving by the city passenger railway companies, streets occupied by them, I present the following statement of expenditures that have been made by the City for repaving with improved pavement the streets not occupied by railway companies, under appropriations, during the years 1890 and 1891:

1890.....	\$434,892 61
1891	413,659 63
Total.....	\$848,552 24
Average expended per year.....	\$424,276 12

The amount of the appropriation made to this date for 1892. for repaving with improved pavement the streets of the City. is \$325,000.00, which amount will no doubt be increased during the year.

The following are the amounts paid by the City for repaving streets occupied by passenger railway companies in the years 1889 and 1890, by authority of the ordinance of Councils approved February 2, 1882, and for the payment of which the companies are responsible :

1889	\$198,025 08
1890	247,481 75
Total	<u>\$445,506 83</u>

Upon the decision of the Supreme Court, affirming the opinion of the lower Court, that the passenger railway companies were responsible for repaving with improved pavement, from curb to curb, the streets occupied by them, the Law Department forwarded to each company the bills paid by the City for the repaving upon the streets occupied by the several companies, for settlement, the bills aggregating in amount \$445,296.75.

The original bills presented by the City included the entire repaving on streets occupied by the company ; each bill, therefore, included the intersections ; when occupied by two companies, each was charged for them. The bills are now being corrected, that each company will pay its proportion of the charges for intersections. When corrected, it is believed each company will pay its indebtedness into the City Treasury. The Ridge Avenue Passenger Railway Company has paid its bills, \$24,076.74.

There have been several conferences with a committee of the Presidents of the passenger railway companies to have an agreement of the amount of repaving each company would do during the year 1892, but there has not been an offer made by the companies that the Department could recommend to the Committee of Councils.

In view of the fact that the City has expended an average of \$424,276.12 each year during 1890 and 1891 for improved pavements, and in the latter year the railway companies have done nothing, I submit the accompanying schedule of streets that the several companies should repave during the year 1892.

The work here laid out is an extension of the repaving upon the streets that were before approved by the Committee

of Councils ; by continuing the work upon them the streets in the City proper will be in order, and the surface of the entire street available for travel. On account of the condition of the streets in many places, the driveway at the present time is practically confined to the car tracks.

Yours very respectfully,

JAMES H. WINDRIM,

Director.

AND WHEREAS, The said Philadelphia Traction Company, lessee of the said Passenger Railway Companies did, on the said 31st of March, A. D. 1892, duly execute and deliver in escrow to Hon. James R. Gates, President of Select Council, its certain agreement wherein the said Philadelphia Traction Company agreed, in consideration of the grant to it and to the said companies hereinbefore recited, of which it is the lessees as aforesaid, that it would do certain things therein set forth :

AND WHEREAS, Doubts have been expressed as to the power of the Mayor to enter into said agreement, and to accept the same on behalf of the said city ; Therefore,

SECTION 1. *Be it ordained by the Select and Common Councils of the City of Philadelphia*, That the Mayor of said city be, and he is hereby directed to enter into a contract with the said Philadelphia Traction Company, which shall substantially provide that, in consideration of said grants heretofore made to the Union Passenger Railway Company, the Continental Passenger Railway Company, the Philadelphia and Grays’ Ferry Passenger Railway Company, the

Catherine and Bainbridge Streets Railway Company, the Thirteenth and Fifteenth Streets Passenger Railway Company, the Twenty-second Street and Allegheny Avenue Passenger Railway Company, and the Empire Passenger Railway Company, of the right to use electric motors to be supplied from over-head wires, and to erect and maintain poles to support said wires, which said companies are leased and operated by the said Philadelphia Traction Company, it, the said Philadelphia Traction Company shall therein covenant with the said city as follows, to wit:

A. That the said Company shall, under the supervision of the Department of Public Works, pave in a good, substantial and workmanlike manner, with Belgian blocks, the following streets of the City of Philadelphia, namely: Twelfth, Thirteenth, Fifteenth, Sixteenth, Eighteenth, Twentieth, Filbert, Sansom, Spruce, Pine, Catherine, Bainbridge, Christian, Ellsworth, Morris, Tasker, Master and Jefferson streets; Susquehanna avenue, from Seventh to Coral, on Coral to York, on York to Frankford avenue, and on Memphis from Lehigh avenue to Norris.

Said pavements shall be done from curb to curb, for such length of each street as shall be occupied by poles and Trolley wires. Said paving shall be commenced upon each of said streets as soon as the construction of said poles and Trolley wires shall be commenced thereon, and shall be pushed to completion with all reasonable and proper diligence; if not thus pushed, the city may complete the same at the expense and cost of the said Philadelphia Traction Company.

B. The said Philadelphia Traction Company and the said Passenger Railway Companies owning railways on said streets, shall at all times hereafter keep the said paving in good repair, so long as the said Trolley wire system shall be maintained thereon. Said paving and repairing shall not excuse the said Philadelphia Traction Company or said railway companies from any other duty to pave and to repair now incumbent upon them or it.

C. Before the said Philadelphia Traction Company shall proceed to erect poles or wires on any of said streets it shall submit to the Department of Public Safety of the said City of Philadelphia for its approval, detailed plans showing the size

and number of said poles which it is proposed to erect upon each square or block, and the number of over-head wires, including guard and feed wires, and the location of the same: Unless said plans shall embody the best known methods of construction, said Department shall not be obliged to approve the same.

D. The voltage on the said Trolley wires shall not exceed five hundred volts, and all feed wires shall be thoroughly insulated under the supervision of the Department of Public Safety.

E. The said Company shall introduce all necessary cutouts and safety devices, and shall at all times use the newest and most approved electric motors and machinery in the construction and operation of said system, and shall at all times conform to all reasonable ordinances regulating the rate of speed at which cars shall be propelled.

F. If at any time hereafter a method of propulsion of street passenger railways by electricity not requiring the maintenance of poles or overhead wires shall be devised which will be demonstrated to be safe, practicable, and reasonably economical, and which shall be successfully introduced into general use in other large cities of the United States having a population of three hundred thousand inhabitants and over, it shall be lawful for the City to demand the appointment of a commission of experts to investigate such system, and to report in writing thereon. Said commission shall consist of three experts, one to be chosen by the person who shall then be Mayor of this City, another by the person who shall then be President of the Philadelphia Traction Company, and the third by the two first chosen. If the Philadelphia Traction Company within fifteen days after notice from the Mayor to appoint shall fail to name its expert, or if the two first chosen shall for fifteen days fail to agree upon a third expert, it shall be lawful for such person as shall then be Chief Justice of the Supreme Court of Pennsylvania, upon the request of the Mayor, to appoint an expert to supply the place of the one who shall not be appointed as above required.

If the majority of the experts thus chosen shall report in writing that a system of propulsion of cars by electricity which dispenses with poles and overhead wires has been devised which shall have been demonstrated to be safe, practicable, and rea-

sonably economical, and that said system has been successfully introduced into general use in other large cities of the United States of a population of three hundred thousand or over, it shall be the duty of the Philadelphia Traction Company and of the passenger railway companies whose railways are now in the possession of the said Philadelphia Traction Company as lessee, if it or they shall then be using the overhead system of wires, to remove such poles and overhead system of wires with all reasonable diligence, and to substitute therefor such other method of propulsion by electricity as soon as the consent of Councils shall be given to such substitution.

SECT. 2. A contract embodying the terms herein stated shall be drawn by the City Solicitor, which shall be executed by the Mayor on behalf of said City, and by the said Philadelphia Traction Company.

APPENDIX No. 21.

Philadelphia, April 14, 1892.

To the Presidents and Members of Select
and Common Councils of the City of Philadelphia.

GENTLEMEN:—The Joint Special Committee on World's Columbian Exposition, Chicago, 1893, to which was referred the bill entitled "An Ordinance authorizing the Joint Special Committee appointed to make arrangements for the proper representation of the City of Philadelphia, and for the exhibition of the Liberty Bell at the World's Columbian Exposition at Chicago, 1893, to appoint certain officers, and to fix their salaries," respectfully report that on the eleventh day of January, 1892, the Committee met and organized for the work. At that time there were less than forty applicants from Philadelphia for space at the Chicago Exposition. Your Committee appointed a General Agent, Secretary, and Sergeant-at-Arms, and also put itself into communication with the applicants in question, ascertained the character of their proposed exhibits,

and supplied them with such information as they desired, to facilitate their work of making exhibits; also, made known through the Press of the City the fact that the Committee had established headquarters, on second floor, at southeast corner of Fifth and Chestnut streets, neatly furnished, and was ready to aid prospective exhibitors in any way in its power.

The result is seen in the fact that the number of Philadelphia applicants for space has increased from thirty-seven, the number at the date of the Committee organization to two hundred and ninety-seven, the number reported up to April 13th. The whole number of applicants for space from Pennsylvania, including Philadelphia, is three hundred and eighty-six. Of this number more than two-thirds are from Philadelphia.

The applicants for space from Philadelphia are being added to at the rate of about six per day.

Your Committee several weeks ago issued an "Exhibitor's Manual," compiled by its General Agent, containing the rules and regulations of the management of the Exposition, together with a complete list of Philadelphia applicants for space up to March 15, 1892, with their addresses and the character of their proposed exhibits, a copy of which was sent to each applicant, and copies of which are on hand at the office of the Committee for free distribution to the public.

The Committee has secured the co-operation of the Board of Trade, the Manufacturers' Club, Drug Exchange, Lumbermen's Exchange, Builders' Exchange, Grocers' and Importers' Exchange, Produce Exchange, the Committee on Womens' Work, New Century Club, the Florists' Exchange and other industrial and business interests, each of which has elected a representative to an Auxiliary Committee, which holds weekly sessions with the Executive Committee of your joint special Committee.

The rapid increase in the number of Philadelphia applicants and the broadening of the scope of the work of your Committee, occasioned by the promptness with which Philadelphia's interests have responded to the call of the Committee for co-operation in the cause have very materially added to the duties of the Committee, necessitating a large amount of clerical work and constant attention to the wants of persons who have applied for space or who are desirous of applying.

It appears to be the universal testimony of the officers of the State Commission at Harrisburg, as well as the managers of the Exposition at Chicago, and the press of the country, that Philadelphia, "the Centennial City," is far ahead, both in the number of its applicants and in the scope and extent of its preparations of any city in the United States, with the exception of Chicago itself. This has been accomplished through the efforts of your Committee, which have been and will be directed not only to securing historical exhibits, but to enlisting and aiding the various branches of industry of this City in making such displays as will inevitably result in advancing the business interests of Philadelphia.

The Committee desires also to testify to the generous co-operation accorded it in its work by the press of Philadelphia, and to make known the fact that the newspapers have, without exception, shown a zeal and an interest in the cause, both through their news and editorial columns, which have had an immense influence in arousing public sentiment and stimulating effort on the part of our citizens; and if Philadelphia shall distinguish herself at the Exposition by the character and extent of her representation, as every indication justifies us in supposing she will, the credit of placing her in the proud position will be very largely due to our newspapers which have shown such marked public spirit and such practical interest in the matter.

In view of the work that has been done, and the prospect of a considerable increase in the duties of your Committee, we would urgently recommend the passage of the annexed ordinance.

Elias P. Smithers, (*Ch'n*), Edward W. Patton, Wencel Hartman, Thomas Firth, Thos. M. Hammett, William McMurray, William McMullen, Jos. H. Brown, Wm. Van Osten, Wm. H. Garrett, Edward Morrell, Ellsworth H. Hults, R. C. Horr, Chas. K. Smith, Peter Monroe, F. M. Harris, Jas. B. Anderson, James L. Miles, George W. Kendrick, Jr. Thos. J. Rose.

AN ORDINANCE

Authorizing the Joint Special Committee appointed to make arrangements for the proper representation of the City of Philadelphia and for the exhibition of the Liberty Bell, at the World's Columbian Exposition at Chicago, in 1893, to appoint certain officers and to fix their salaries.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That the Joint Special Committee appointed to make arrangements for the proper representation of the City of Philadelphia, and for the exhibition of the Liberty Bell at the World's Columbian Exposition at Chicago, in 1893, be, and they are, hereby authorized to appoint the following officers, viz.: General Agent, who shall give his entire time to the work of the Committee; a Secretary, Sergeant-at-Arms and Office Boy.

SECT. 2. The said Joint Special Committee may at any time dispense with the services of any or all of said officers, and during the time they are employed their salaries shall be as follows: General Agent, not exceeding two hundred and seventy-five (275) dollars per month; Secretary, not exceeding seventy-five (75) dollars per month; Sergeant-at-Arms, not exceeding thirty-five (35) dollars per month; Office Boy, not exceeding twenty-five (25) dollars per month.

The above salaries to commence from January 11, 1892, except Office Boy, and his salary to commence from April 1, 1892; the said salaries to be charged to Item 7 $\frac{3}{4}$, in the annual appropriation to the Clerks of Councils, for the year 1892. All ordinances or parts of ordinances inconsistent herewith, be and the same are, hereby repealed.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—We, your Committee on Surveys and Regulations, to whom was referred the accompanying ordinance to amend an ordinance to authorize the construction of main sewers on Howard, Ninth, and Hutchinson streets, Bellfield avenue, and other streets, beg leave to report, that in a report

made to your Honorable Bodies in January last on the subject of the necessities of the public for main sewers, and respecting the distribution of the appropriations therefor, this Committee called your attention to the fact that while there was an imperative necessity for several main sewers, there was absolutely no means to build them.

Under these circumstances a vigilant watch must be kept upon the contracts awarded to secure and use any balances that may become available. The amounts thus far obtained will allow of the amount to be expended on the Mill Creek extension to be increased by twenty-nine thousand dollars, for which the passage of the ordinance referred to the Committee is necessary.

We therefore return it with a favorable recommendation.

All ordinances or parts of ordinances inconsistent herewith be, and the same are, hereby repealed.

APPENDIX No. 37.

OFFICE OF THE MAYOR.

Philadelphia, May 5, 1892.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN: I have the honor to herewith transmit for your consideration a communication, which has my approval, from Abraham M. Beitler, Director of the Department of Public Safety, requesting an appropriation to enable the Department to pay sub-officers detailed for duty at certain Public Squares.

I am, respectfully,

EDWIN S. STUART,
Mayor.

—

DEPARTMENT OF PUBLIC SAFETY,

Philadelphia, May 2, 1892.

HON. EDWIN S. STUART,
Mayor of Philadelphia.

DEAR SIR:—Recently the needs of the several Districts have required that all the patrolmen should be assigned to street duty, and I have been compelled to do away with some special assignments. This has deprived Rittenhouse, Washington, Independence, and some other squares of officers, whose duties were confined to those squares. The near approach of warm weather makes it desirable that officers should be detailed for these squares above named, and for Norris, Franklin, Logan, Jefferson and Passyunk Squares, and Bartram Park, for the summer months. I would suggest that Councils be asked to appropriate three thousand four hundred and forty-two (3,442) dollars, to enable this Department to employ nine (9) officers for five months. The

matter can be adjusted in each district by detailing the oldest "sub" officer as a regular for these five months.

Yours very truly,

ABRAHAM M. BEITLER,

Director.

Barnes, late assistant foreman of No. 12, who was killed on Sunday, April 3d, by being thrown from the truck; also, an ordinance to authorize the census of the City to be taken and to make an appropriation therefor; also, an ordinance to make an appropriation of \$6,500 to the Board of Public Education to pay for removal of 13,000 cubic yards of gravel at Sixteenth and Cumberland, Twenty-eighth School Section, and submit the annexed ordinances for said purposes and recommend their passage.

Elias P. Smithers, (*Ch'n*), Chas. F. Isminger, Wencel Hartman, Wm. C. Haddock, Wm. Van Osten, Chas. Roberts, Geo. B. Edwards, W. H. James, Chas. K. Smith, Thos. J. Rose, Jos. H. Brown, Thos. M. Hammett, Edw. W. Patton, Isaac D. Hetzel, Jas. B. Anderson.

To the Chairman and Gentlemen of the Finance Committee of Select and Common Councils:

Your sub-committee, to whom was referred the accompanying ordinance entitled "An Ordinance to make an appropriation to the Board of Public Education for the year 1892," for investigation, and respectfully report that in pursuance of notice, they met on Tuesday, April 26, 1892, at one o'clock P. M., at the office of the Clerks of Councils, when and where they were attended by Mr. Isaac Wood, Mr. Paul Kavanagh, of the Board of Education, Mr. Anschutz, the assistant architect of the same board and by several other gentlemen as witnesses. From the testimony it appears that on or about June 20, 1891, the Committee on Public Property of the Board of Public Education advertised for proposals for the erection of a school house at Sixteenth and Cumberland streets, and before the bids were opened the architect of the board, Mr. Austin, was asked if it was part of the contract that the large amount of gravel then on the lot should be removed by the successful contractor, to which the answer was given, "No; Mr. McKibben, the owner of the gravel, has been notified to remove it at once."

The contract was awarded to Isaac Wood at the price of \$58,000, and the school house has been erected in a proper and satisfactory manner. Before, however, proceeding with the work of construction, finding that the owner of the gravel would not remove it, Mr. Wood obtained bids for its removal, and finally gave the work to one Thomas Gains, at the price of 50 cents per cubic yard, who removed the same. The amount of material was removed by him and was measured by Thomas Gamon, a well known and reputable sworn measurer, who certified that the amount so removed was 13,000 cubic yards, and for which Mr. Wood paid Mr. Gains the sum of \$6,500, and produced his receipt therefor. Mr. Gains also testified that he had been paid that amount for such removal. From the testimony laid before your sub-committee they are satisfied that the removal of this gravel was no part of the contract for the erection of the school house and that the contractor, Mr. Wood, was compelled to remove it at his own expense before he could proceed with his contract work, and they, therefore, in justice to him, recommend that your body return the ordinance to Councils with a favorable recommendation.

APPENDIX No. 42.

Philadelphia, May 4, 1892.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN :—We, your Committee on Surveys, to whom was referred the accompanying ordinances to place Fifty-four and one-half, Thayer, Wallace, and Wrecker streets on the city plan, beg leave to report that the situation and width of these streets have received careful consideration, and are satisfactory. Fifty-four and one-half street does not run in exactly a straight line, owing to the streets which are on either end not running in a parallel line, and to compel a straight line would cut the ground to a disadvantage without any benefit to the city. A proviso that dedication be made, or that the city be released from or indemnified against damages, is added. We therefore report the ordinance with a favorable recommendation.

Thomas L. Hicks (*Ch'n*), D. C. Cleaver, Lewis Moore, John H. Baizley, J. F. Henderson, Wm. Horrocks, Jacob J. Seeds, Wm. B. Souder, Isaac D. Hetzell, Jas. B. Anderson, Hiram A. Miller, Jos. M. Adams, P. A. McClain, Wm. G. Rutherford.

AN ORDINANCE

To place Fifty-four and one-half, Thayer, Wallace, and Wrecker streets on the City plan.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That the Department of Public Works be authorized to place upon the city plan Fifty-four and one-half street, of the width of thirty feet, from Westminster avenue to Haverford avenue; Thayer street, of the width of thirty feet, from Fourth street to Lawrence street; Wallace street, of the width of thirty feet, from Forty-eighth street to Forty-ninth street; Wrecker street, of the width of thirty feet, from Cedar street to Commerce street: *Provided*, That the ordinance approved April 8, 1890, providing that streets shall run in a straight line, be, and the

same is repealed in so far as it relates to Fifty-four and one-half street: *And provided*, That the owners of ground within the lines of said streets shall first dedicate the same as public highways, or shall first file a bond, or enter into a written agreement, satisfactory to the City Solicitor, indemnifying the city against all damages that may arise, or covenanting and agreeing to obtain releases from all such owners of all damages that may arise by reason of the placing or opening of the same, before this ordinance shall go into effect.

APPENDIX No. 43.

Philadelphia, May 5, 1891.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN :—We, your Committee on Surveys, to whom was referred the accompanying bill entitled “An Ordinance to amend ordinance to place Adeline, Cross, Taylor, Ritchfield, Fontaine, Race, and Paul streets on the city plan, in so far as it relates to Adeline street,” beg leave to report the owner of the property is desirous of having Adeline street forty-four feet wide instead of thirty feet, and as the ordinance authorizing the placing of the street on the plan provides for a dedication of the ground, or the filing of an agreement indemnifying the city from all damages, we ask for favorable consideration of the annexed ordinance.

Thomas L. Hicks (*Ch'n*), D. C. Cleaver, L. W. Moore, John H. Baizley, J. F. Henderson, Wm. Horrocks, Jacob J. Seeds, Wm. B. Souder, Isaac D. Hetzell, Jas. B. Anderson, Hiram A. Miller, Jos. M. Adams, P. A. McClain, Wm. G. Rutherford.

AN ORDINANCE

To amend ordinance to place Adeline, Cross, Taylor, Ritchfield, Fontaine, Race, and Paul streets on the city plan, in so far as it relates to Adeline street.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That the ordinance entitled “An

Ordinance to place Adeline, Cross, Taylor, Ritchfield, Fontaine, Race, and Paul streets on the city plan," approved July 17, 1891, in so far as it relates to Adeline street, be altered and amended by striking out the word "thirty" and inserting the word "forty-four," so that the ordinance shall read: "Adeline street, forty-four feet wide, from Forty-seventh to Forty-eighth street."

APPENDIX No. 44.

Philadelphia, May 5, 1892.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—We, your Committee on Surveys, to whom was referred bill entitled "An Ordinance to authorize the revision of the lines and grades of a portion of Plan No. 307." beg leave to report that the change contemplated by this ordinance is made at the suggestion and for the accommodation of the Philadelphia Bourse. This organization contemplates the erection of a building costing about two million dollars, and as large numbers of people will daily congregate in and around the same, it is thought that the sidewalks should be increased in width. A building on the northeast corner of Fifth and Ranstead streets, owned by the Girard Estate, and a small graveyard adjoining, if allowed to remain, would very materially interfere with a proper construction of the building of the Bourse. By the change contemplated both of these will be removed. A proviso has been inserted in the ordinance by the Committee compelling the Bourse to dedicate to the city, or release from all damages, all the property it may own. The property affected by the change other than that owned by the Bourse is assessed at \$161,500, although of some of these properties only a portion is taken.

Your Committee think that the surrounding property will be enhanced in value by the building of the Bourse and the change of the lines of the streets to an extent to very soon reimburse the City for any expense contracted therefor. It is believed that the erection of a building such as is contemplated

fully justifies the city in making the changes authorized by this ordinance.

We therefore report the ordinance with a favorable recommendation.

Thomas L. Hicks (*Ch'n*), D. C. Cleaver, Lewis Moore, John H. Baizley, J. F. Henderson, Wm. Horrocks, Jacob J. Seeds, Wm. B. Souder, Isaac D. Hetzell (for report), Jas. B. Anderson (for report), Hiram A. Miller, Jos. M. Adams, P. A. McClain, Wm. G. Rutherford.

AN ORDINANCE

To authorize the revision of the lines and grades of a portion of Plan 307.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That the Department of Public Works be, and is, hereby authorized to revise lines and grades in a portion of Plan No. 307, in such manner that Ranstead street, between Fourth and Fifth streets, shall be forty (40) feet wide; Merchant street, between Fourth and Fifth streets, shall be twenty-five (25) feet wide; Fourth street shall be widened on the west side to sixty-seven (67) feet between Ranstead and Market streets; and Fifth street shall be widened on the east side to seventy-six (76) feet between Ranstead and Market streets: *Provided*, That the owners of property on the west side of Fourth street, between Ranstead and Merchant streets, on the north side of Ranstead street, west of Fourth street, on the south side of Merchant street, west of Fourth street, and on the east side of Fifth street, between Merchant street and the graveyard, shall first dedicate so much of their ground as shall be taken by the widening of said Fourth, Fifth, Ranstead, and Merchant streets, as provided by this ordinance, or shall enter into a written agreement, satisfactory to the City Solicitor, to release the city from the payment of damages for taking said property.

APPENDIX No. 50.

OFFICE OF THE MAYOR.

Philadelphia, May 11, 1892.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN :—I have the honor to herewith transmit for your consideration a communication from Abraham M. Beitler, Director of the Department of Public Safety, concerning a Fire

boat for the city. The recommendations of the Director have my entire approval, and I trust that your Honorable Bodies will make the additional appropriation of ten thousand (10,000) dollars, and thus enable the city to obtain a boat of sufficient size and power to perform the work which may be necessary, and which in her construction and fitting-up will be a credit to the municipality.

I am, respectfully,

EDWIN S. STUART,

Mayor.

—

DEPARTMENT OF PUBLIC SAFETY.

Philadelphia, May 10, 1892.

HON. EDWIN S. STUART,

Mayor of the City of Philadelphia.

DEAR SIR:—Councils appropriated \$40,000 for the construction of a Fire boat. I have, together with the Chief of the Bureau of Fire and Mr. Hartman, Chairman of the Committee on Police and Prisons, and Mr. Smithers, Chairman of the Finance Committee, visited Brooklyn and Baltimore and made a careful inspection of the “Seth Low” in the former city and of the “Cataract” in the latter city. I have also been in correspondence with Mayor Bishop, of Buffalo, and have received from him the specifications under which they have recently let a contract for another Fire boat in that city.

I have ascertained that for our service we ought to have a boat 105 feet in length. This is six feet longer than our Police boat No. 1, the “William S. Stokley.” Mr. William Cowles, of Brooklyn, a recognized expert in the preparation of plans for these boats, who has, I believe, designed almost all of the Fire boats now in use in the United States, prepared plans, under my direction, for a boat which should be staunch and strong and should have all modern appliances. I directed him to aim at durability and service. With this object in view, Mr. Cowles has prepared plans for a boat having an iron hull, having the power sufficient to guarantee fourteen knots per hour, with sufficient boiler and pump capacity to discharge from a four-inch swivel nozzle a stream calculated to be 6,500

gallons per minute, and capable of maintaining four or six lines of hose. Such a boat, equipped with everything necessary to make it first-class, will cost, I am advised and believe, \$50,000. The new boat for Buffalo, only eighty-four feet in length, has just been let in that city for about \$40,000. There is no reason why Philadelphia should not have a first-class boat, and in my judgment it is poor economy to build a small boat with correspondingly small power at \$40,000, when twenty-five per cent. more will give us a first-class boat, with the splendid power of the boat designed by Mr. Cowles. I earnestly recommend that Councils be asked to appropriate \$10,000 additional to this item, that I may be enabled to advertise and award the contract before Councils adjourn for the summer. With this additional appropriation, we will have by the end of the year a Fire boat of which the city may be proud, and which I am firmly convinced will demonstrate before the close of the next year that it will save its cost many times over every year it is in service.

Yours respectfully,

ABRAHAM S. BEITLER,

Director.

There is no necessity for a street of greater width than forty feet, and as it has been reduced between Twentieth and Twenty-first streets this will make it of uniform width. REPORT OF COMMITTEE ON MEMORIAL HALL.

Philadelphia, April 2, 1892.

To the Commissioners of Fairmount Park.

The Committee on Memorial Hall, to whom the matter of the Wilstach will was referred, beg leave to report :

That by her will, duly proved at Philadelphia March 2, 1892, Anna H. Wilstach gave, devised and bequeathed one-fourth part of the residue of her estate to the City of Philadelphia, if accepted by the Fairmount Park Commissioners, upon the condition to erect a secure art gallery in the Park for the exhibition of pictures and works in the fine arts, on a plan similar to the new building for such exhibition at Dresden, Saxony; but she also provides that if there should be a suitable permanent building left in said Park after the Centennial celebration of 1876, in which pictures may be received, then the erection of another building may be omitted. She also gave and bequeathed to said City of Philadelphia, under the control of the Park Commissioners, all her pictures, statuary and paintings.

In the seventh codicil she gives and bequeaths to the City of Philadelphia all her paintings, engravings, statuary, photographs, books on art and works of art, owned by her at the time of her decease, to be placed in Memorial Hall and be

under the control of the Fairmount Park Commissioners. She provides also in said codicil: "I hereby direct the City of Philadelphia shall, within six months after my will shall have been admitted to probate, signify their acceptance of this trust."

In view of the nature and extent of the bequest, the committee recommend that the same be accepted by the Park Commissioners, and submit a resolution for that purpose; and in view of the last codicil an ordinance is also herewith submitted, in order that there shall be an acceptance both by the Park Commission and the City of Philadelphia.

The Committee recommend that after the acceptance is completed the Commissioners formulate a plan for carrying out fully the intent of the testatrix, and for laying upon a broad scale the foundation for an extensive art gallery in the park.

Respectfully submitted,

SAMUEL GUSTINE THOMPSON,

Chairman.

To the Committee on Municipal Government.

GENTLEMEN :—Your Sub-Committee, to whom was referred ordinances to repeal the ordinance placing on the City plan Stephen E. Fotterall Park, and one to substitute Forepaugh Park, in the Twenty-eighth Ward, accompanied by petitions, respectfully report that the only reasons offered for the change are that “the Forepaugh lot is situated on one of the finest thoroughfares of the city, surrounded by handsome improvements and free from dangerous railroad crossings.” Your Sub-Committee believe that when a plot is once placed on the City plan, and owners of the plots and adjacent owners in some measure make their arrangements accordingly in good faith that the city will keep its engagements, only strong reasons should induce the repeal of such ordinances. No reasons but those quoted are offered—and these were all fairly considered by the Committee of last session, when the Stephen E. Fotterall Square was selected in preference to the one here asked for. The petitions now presented have one hundred and thirty-eight signers for the Forepaugh lot, while the one for retaining the Fotterall lot is signed by three hundred and fifty-five.

Your Sub-Committee report the ordinances negatively.

CHAS. ROBERTS,

APPENDIX No. 100.

LAW DEPARTMENT.

Philadelphia May 31, 1892.

ELIAS P. SMITHERS,

Chairman Committee on Finance.

DEAR SIR:—Your letter enclosing a copy of an ordinance entitled “An Ordinance to authorize the creation of a loan by the City of Philadelphia for the sum of one million dollars for the construction of a reservoir, etc.” is at hand. You ask me to advise you whether the City is authorized to borrow the sum named, and if so, examine the bill as to form and indicate any necessary correction therein.

Upon inspection of the Ordinance, I find that it is entitled “An Ordinance to authorize the creation of a loan by the City of Philadelphia for the sum of one million dollars for the construction of a reservoir in the Twenty-eighth Ward and for other purposes connected with the water supply of the City,” and by the various sections it is provided as follows:

“SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That the Mayor of Philadelphia be, and is hereby authorized to borrow from the highest bidders, at not less than par on the faith and credit of the City of Philadelphia, a sum not exceeding one million dollars for the construction of a reservoir on the ground in the Twenty-eighth Ward, appropriated by virtue of the ordinance approved day, 1892, and for other purposes connected with the supply of water to the City.

“SECT. 2. Interest on the said loan at a rate not exceeding four per centum shall be paid by the City half yearly on the first day of the months of January and July at the office of the fiscal agency of the City of Philadelphia. The principal of said loan shall be divided into twenty series of fifty thousand dollars, each alphabetically arranged, and each series shall be paid annually on the thirty-first day of December, 1902. The certificates of said loan shall be in the usual form, in such amounts as the lenders may require, in sums of one hundred dollars and its multiple; and it shall be expressed in said certificates that the loan therein mentioned and the interest

thereon are payable in lawful money of the United States, and free from all taxes.

“SECT. 3. Whenever any loan shall be created by virtue of this ordinance, there shall be thereafter annually appropriated out of the income of the City of Philadelphia, and from the money raised by taxation, a sum sufficient to pay the interest on said loan, and after the loan shall become payable there shall be annually appropriated for the payment of the principal sum of fifty thousand dollars.”

In reply I state that Section 8, of Article IX, of the Constitution of 1874 reads as follows: “The debt of any county, city, borough, township, school district or other municipality or incorporated district, except as herein provided, shall never exceed seven per centum upon the assessed value of the taxable property therein, nor shall any such municipality or district incur any new debt, or increase its indebtedness to an amount exceeding two per centum upon such assessed valuation of property, without the assent of the electors thereof at a public election in such manner as shall be provided by law; but any city, the debt of which now exceeds seven per centum of such assessed valuation, may be authorized by law to increase the same to three per centum, in the aggregate at any time, upon such valuation.”

This provision of the Constitution makes distinction between the two classes of cases. The first, where the total debt of the county, city, borough, etc., did not exceed seven per centum of the assessed valuation of such county, city, borough, etc., before the adoption of the Constitution; and, second, where, at the time of the adoption of the Constitution, the debt did exceed seven per centum of the assessed valuation of the property. The City of Philadelphia comes within the second class of cases.

There have been numerous cases decided by our Supreme Court in reference to the increase of indebtedness of cities; among others, *Wheeler vs. City of Philadelphia*, 7 Pa. St. Reports, 338; *Appeal of the City of Erie*, 98 Pa. St. Reports, 398; *Pike County vs. Rowland*, 94 Pa. St. Reports, 249; *Appeal of the City of Wilkesbarre*, 109 Pa. St. Reports, 559; *Ackerman vs. Buchanan*, 109 Pa. St. Reports, 254; *Appeal of Millerstown vs. Frederick*, 114 Pa. St. Reports, 435.

All of these cases excepting the first, however, relate to the increase of indebtedness in counties, boroughs, etc., which come within the first class of cases,—namely, the indebtedness of which did not exceed seven per centum before the adoption of the present Constitution.

The only one of these which throws any light upon the present question is the case of *Wheeler et al. vs. City of Philadelphia et al.* 7th Pa. St. Reports, 338. In an opinion of the Court delivered by Mr. Justice Paxson, in considering the eighth section of Article VIII of the Constitution, which is the one I have cited above, he says :

“ This section is not clearly expressed, yet its true meaning may be gathered with reasonable certainty. The end sought to be attained was clearly a limitation upon the debt of municipalities, and seven per centum upon the assessed value of the taxable property therein was fixed as the maximum. The fact was, however, known to the convention that at that time the debt of the City of Philadelphia and perhaps some other municipalities exceeded seven per centum. In such instances an arbitrary provision, that there should be no further increase of the debt, might have worked great injury by the stoppage of public works already commenced and essential to the public convenience and welfare. It was, therefore, provided, that as to such municipalities the debt might be increased three per centum. The main controversy, however, was as to the manner in which such increase should be accomplished. Here again the distinction is preserved between municipalities whose debt is under seven per centum, and those in which it exceeds seven per centum. In the former, the municipal authorities may increase the debt from time to time until two per centum has been added, provided the original debt, with the increase, does not exceed seven per centum. After the two per centum has been added there can be no further increase without the vote of the people. To illustrate :

“ The whole debt is not to exceed seven per centum.

“ We will suppose the debt to have been two per centum at the time of the adoption of the Constitution.

“ Two per centum may be added by the municipal authorities, making the debt four per centum.

“ No portion of the remaining three per centum can be added without the assent of the electors of such municipality

at a public election in such manner as shall be provided by law. But when a city, whose debt at the time of the adoption of the Constitution already exceeded seven per cent. seeks to increase its debt, it can do so only with the consent of the law-making power of the State. The Constitution has interposed the Legislature between such municipality and any further increase of its debt. But when the legislative sanction has been obtained, the municipal authorities may increase the debt precisely as in the case of towns whose debt is less than seven per centum. The proposed increase here is one per centum. This clearly does not require a vote of the people. Whether it would have been necessary to have submitted the question to a popular vote, had the increase exceeded two per centum, is a question about which we express no opinion. When the point is legitimately raised we will decide it.

“We regard this as the true and reasonable construction of the section of the Constitution referred to. It does no violence to any known rule of interpretation, and carries out the plain object of the section.”

An Act of Assembly was passed April 20, 1874, P. L., 65, which provided that any city may incur a debt, or increase its indebtedness to an amount in the aggregate not exceeding two per centum upon the assessed value of the taxable property therein, as fixed and determined by the last preceding assessed valuation thereof.

Another Act passed May 23, 1874, P. L., 234, provided that the Councils of any city of the first class, the debt of which now exceeds seven per centum upon the assessed value of the taxable property therein, shall be, and they are hereby authorized to increase the said debt one per centum upon such valuation. The said Act further provided that the word “indebtedness,” used in this Act, shall be deemed, held and taken to include all and all manner of debt, as well floating as funded of the said municipality, and the net amount of such indebtedness shall be ascertained by taking from the gross amount thereof the moneys in the treasury, all outstanding solvent debts and all revenues applicable in one year to the payment of same.

The Act approved June 11, 1879, P. L., 137, provided that Councils of cities of the first class be, and they are hereby authorized to fund the present floating indebtedness of said

cities, to the extent of ten million (10,000,000) dollars, provided that the said loan shall not exceed two per centum upon the assessed value of the taxable property of said cities.

These Acts of Assembly gave to the City of Philadelphia the power to increase her indebtedness three per centum, but the increase authorized by the Act of June 11, 1879, was for the purpose of funding the present floating indebtedness only. The indebtedness of the City of Philadelphia prior to the adoption of the Constitution having been more than seven per centum, legislation was required to enable her to increase her indebtedness, and the Acts already cited—May 23, 1874, and June 11, 1879—were passed to give the city such authority. If the increase was made in accordance with these statutes, no further loan can be made until the Legislature again passes an enabling Act. If, however, the increase was not made to the full limit the loan can be made, provided it does not exceed that limit.

Enclosed I send you a copy of a letter from the Controller bearing date of May 31, 1892, giving the amount of real estate and personal property subject to taxation for city purposes in the year 1875, and showing the percentage of same with figures of total and net debt to January 1, 1892. This is more a question of fact or computation of figures than of law, but in view of the statement furnished by the Controller it appears that the loan can be created.

Yours respectfully,

CHAS. F. WARWICK,

City Solicitor.

APPENDIX No. 115.

Philadelphia, June 2, 1892.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—Your Committee on Gas, to whom was referred an ordinance entitled “An Ordinance to reduce the price of gas in Philadelphia,” beg leave to present the following report:

There was manufactured during the year 1891, in the Gas Works of the City 3,391,887,000 cubic feet of gas. This includes coal gas 2,092,315,000 cubic feet, and water gas 1,299,572,000 cubic feet.

There was consumed in public lighting.....	612,719,028 cubic feet.
Leakage and Wastage	467,970,142 cubic feet.
Making a total of gas manufactured for which the City is not paid.....	1,080,689,200 cubic feet.
The value of which, at \$1.50 per M, being.....	\$1,621,033 80
There was sold to the public during the year 2,311,197,800 cubic feet.	
Netting the City at .50 per M.....	\$3,466,795 70
Receipts from sale of residuals.....	307,275 39
Total receipts from all sources.....	3,774,072 09

Value of gas consumed in public lighting	
\$919,078.54	
Cost of manufacture and delivery.....	2,826,074 70
Balance of profit.....	947,997 39

This amounts to 27 cents per thousand cubic feet, so that if the price were reduced to \$1 per thousand, it would result in a net loss of 23 cents upon every thousand cubic feet manufactured.

While there is an apparent profit of \$947,997.39, the cost of the Bureau of Lighting is not added to the cost of production and delivery in the foregoing statement.

The expense of this Bureau amounts to about \$350,000 per annum, which, deducted from the apparent profit, would leave a net profit to the City of \$597,997.39, being equal to 17 $\frac{2}{3}$ cents per thousand.

In view of these facts your Committee reports back the ordinance with a negative recommendation, and respectfully ask the passage of the accompanying resolution.

Geo. E. Ford (*Ch'n*), Geo. W. Kendrick, Jr, M. S. Apple, Chas. Kitchenman, B. S. C. Thomas, Thos. M. Hammett, Watson D. Upperman, William McMurray, John Morrison, J. Emory Byram, Joseph H. Straub, John L. Baldwin, Wm. A. Miller, John Irvine, Nathan F. Tomlin.

RESOLUTION

To discharge the Committee on Gas from the consideration of an ordinance to reduce the price of gas.

Resolved, by the Select and Common Councils of the City of Philadelphia, That the Committee on Gas be discharged from the further consideration of an ordinance to reduce the price of gas in the City of Philadelphia.

APPENDIX No. 116.

OFFICE OF THE MAYOR.

Philadelphia, June 9, 1892.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—I have the honor to herewith transmit for your consideration, a communication from Abraham M. Beittler, Director of the Department of Public Safety, requesting an appropriation of sixty thousand dollars for the purpose of constructing a duct for electrical purposes, together with the necessary posts, mast arms, cables, etc., on Market street from the Delaware river to Forty-third street. The views of the Director, as set forth in his communication, have my entire approval, and I trust that your Honorable Bodies will see your way clear to comply with his request for this appropriation in order that the telegraph poles, which at present disfigure the north side of Market street, may be removed within the next twelve months.

I am respectfully,

EDWIN S. STUART,
Mayor.

DEPARTMENT OF PUBLIC SAFETY.

Philadelphia, June 9, 1892.

HON. EDWIN S. STUART,
Mayor of Philadelphia.

DEAR SIR:—The wisdom of Councils in requiring many of the telephone and other companies asking for underground privileges in our streets, that they should give the City, as a return for the privileges, a duct or ducts in the conduits laid, has secured for us ducts in many of the streets. The appropriations made during the past six or seven years for underground conduits has enabled this department to lay conduits in several of the main streets. The several conduits laid are

not capable of being fully utilized because of the lack of a few "main" or "trunk" lines of ducts.

The work which to-day is most desired in the matter of removing poles and overhead wires, and of fully utilizing the conduits and ducts the City now owns, is the construction from City Hall east and west on Market street of a number of trunk lines of ducts. Almost as desirable is a main line on Arch street east of Broad and on Chestnut street from river to river.

The Electrical Bureau has drawn the preliminary plans and made estimates of the cost of a conduit containing eighteen ducts, from City Hall to the Delaware river, a distance of six thousand five hundred (6,500) feet. The cost will be approximately \$21,000, which estimate includes the erection of iron posts and mast arms, the purchase of electric light cable, terminal blocks, boxes, plugs, steps, lumber, the construction of manholes, excavation of the street, repaving and all its work necessary to make a finished and complete conduit and light the street. To carry the conduit on Market street to Forty-third street, and to equip the street for lighting, and purchase and draw the cable will cost \$39,000.

I address you this communication in the hope that you will see proper to transmit it to Councils with your approval, and with the request that Councils will, if they can find the money unappropriated, give this department the sum of \$60,000 for the conduit on Market street from the Delaware river to Forty-third street. No better time for the doing of this work can be found than the summer weather. Then the operations will be least interfered with by rain, and the property owners will be least inconvenienced by the tearing up of the streets.

If Councils will make this appropriation the citizens will have the pleasure of seeing the poles and the net-work of wires which now disfigure the north side of Market street removed by this time next year. A City which has in use so much underground cable as Philadelphia should no longer permit the principal business streets to be encumbered by a pole line used almost solely for municipal purposes.

Yours very truly,

ABRAHAM M. BEITLER,

Director.

APPENDIX No. 117.

OFFICE OF THE MAYOR.

Philadelphia, June 9, 1892.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN :—I have the honor to herewith transmit for your consideration a communication from Abraham M. Beitel, Director of the Department of Public Safety, requesting the passage of an ordinance regulating the matter of lamps, bells, speed, etc, of bicycles being driven upon the streets of the city. As complaints relative to this matter have recently been made, and as serious injury and even loss of life may result from the reckless propelling of these vehicles, without any warning of their approach being given, I trust that your Honorable Bodies will enact such regulations as will provide the necessary safeguards for pedestrians.

I am, respectfully,

EDWIN S. STUART,

Mayor.

—

DEPARTMENT OF PUBLIC SAFETY.

Philadelphia, June 9, 1892.

HON. EDWIN S. STUART,

Mayor of Philadelphia.

DEAR SIR :—I have had several complaints recently with regard to bicycle driving on the public streets without bells attached or lamps lighted at night. I referred this matter to the Superintendent of Police, and I have just had a report from him that in one of the districts the Lieutenant was called on by the Counsel for one of the Wheelmen's Associations, and warned not to interfere with riders whose wheels lacked bells and lights, as there was no ordinance requiring bells or lights. I have looked through the Digest carefully, and I fail to find any ordinance bearing upon the subject.

The rules and regulations governing bicycles and tricycles in Fairmount Park require :

“Every machine must have attached to its handle a bell with a spring attachment which may be distinctly heard at a distance of thirty yards—sleigh-bells being inadmissible.”

“Every machine must have a lighted lamp, after dark, attached thereto.”

“Not more than two machines shall be ridden abreast.”

“Riding crosswise and curving to and fro are strictly prohibited.”

“Wheelmen must follow the ordinary rules of the road. In meeting an opposing vehicle they must pass on the right-hand side of the road; in passing a vehicle moving in the same direction, they must pass on the left-hand side.

“The rule restricting the speed to seven miles an hour will be strictly enforced.”

I would suggest that Councils be advised of the complaint made, that they may, if they deem it proper, pass an ordinance regulating the question of lamps, bells, speed, etc.

Yours, respectfully,

ABRAHAM M. BEITLER,

Director.

APPENDIX No. 118.

OFFICE OF THE MAYOR.

Philadelphia, June 9, 1892.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—I have the honor to herewith transmit for your consideration, a communication from Abraham M. Beitler, Director of the Department of Public Safety, requesting an additional appropriation to Item 2 in the annual appropriation to the Electrical Bureau. The amount asked for is needed to pay the expenses incurred in removing and re-erecting electric light poles, made necessary by putting in rounded curbs at many street corners. The necessity for this appro-

priation is urgent in order that the Bureau of Highways should not be delayed and inconvenienced in carrying out proposed work.

I am respectfully,

EDWIN S. STUART,

Mayor.

DEPARTMENT OF PUBLIC SAFETY.

Philadelphia, June 6, 1892.

HON. EDWIN S. STUART,

Mayor of Philadelphia.

DEAR SIR:—Mr. Walker, Chief of the Electrical Bureau, has just received from Mr. Bullock, Chief of the Bureau of Highways, a letter as follows:

“In the accompanying list of streets we propose to put in rounded curbs at all corners. Will you see that the electric light poles are moved so that they will be inside of the curb proposed. Will send you blue-print, showing radius of curbing, as soon as received from the Bureau of Surveys. In the meantime your men can get the information from the surveyors of the several districts.”

I enclose you herewith a copy of the list enclosed with Chief Bullock's letter.

The work referred to by Chief Bullock will make it necessary to remove and re-erect every electric light pole which is at present located upon any of these corners, and the removal of the poles will make necessary a readjustment of the underground conduits and cables leading to the poles.

The bills for this work will have to be paid out of Item 2 of the annual appropriation to the Electrical Bureau. This item will be exhausted before the close of the year for the ordinary repairs necessary in the Bureau.

For this extraordinary work an appropriation of at least \$5,000 should be made. It is almost impossible to tell what it will cost, but the work should be commenced at once and prosecuted or else the paving will be delayed.

I would respectfully ask that you transmit my communication to Councils with an urgent request that the money be ap-

propriated, so that Mr. Walker may at once begin the work of reconstructing these poles and readjusting the conduits and cables.

Yours very truly,

ABRAHAM M. BEITLER,

Director.

—

DEPARTMENT OF PUBLIC WORKS.

Philadelphia, June 4, 1892.

DEAR SIR:—In the accompanying list of streets we propose to put in rounded curbs at all corners. Will you see that electric light poles are moved so that they will be inside the curb as proposed. Will send you blue prints showing radius of curbing as soon as received from the Bureau of Surveys. In the meantime your men can get the desired information from the surveyors of the several districts.

Yours truly,

GEO. A. BULLOCK,

Chief of Bureau of Highways.

GENTLEMEN :—I have the honor to herewith transmit for your consideration a communication from James H. Windrim, Director of the Department of Public Works, stating that the contract for the repaving of Broad street, and the other streets

to be repaved with the blocks removed from Broad street, had been awarded and that the cost for this entire work will be one hundred and eight thousand six hundred and sixty-six dollars in excess of the amount available for that purpose. As this is a needed and most important improvement to the City, the work should be commenced and pushed to completion at an early date, and that this may be done, I desire to earnestly call the attention of your Honorable Bodies to the matter, feeling sure that you will, without delay, take the necessary action to provide for the money needed.

DEAR SIR:—Proposals were invited, in accordance with ordinance of April 9, 1892, for the repaving of Broad street with sheet asphaltum, and for repaving certain streets with the block paving removed from Broad street.

Philadelphia, June 9, 1892.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—We, your Committee on Surveys, to whom was referred the bill entitled “An Ordinance to revise the lines and grades on Plans No. 240 and No. 247, in the Twenty-seventh Ward.” beg leave to report, that to change the surface of the ground to conform to the present plans, will entail great cost in the grading of the streets, much of which can be saved by a revision of the plans. The section is about to be developed, and a change can be made at the present time without damage to anyone. We ask for favorable consideration of the ordinance.

Thomas L. Hicks (*Ch'n*), Jos. M. Adams, M. S. Apple, D. C. Cleaver, L. W. Moore, Jacob J. Seeds, W. H. James,

Hiram A. Miller, J. F. Henderson, John H. Baizley, A. Kinkaid, Wm. B. Souder, Isaac D. Hetzell.

AN ORDINANCE

To revise the lines and grades on Plans 246 and 247, in the Twenty-seventh Ward.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That the Department of Public Works be authorized and directed to revise the lines and grades on Plans 246 and 247, in the Twenty-seventh Ward.

APPENDIX No. 136.

Philadelphia, June 8, 1892.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN :—We, your Committee on Surveys, to whom was referred a communication from the Citizen's Municipal Association of Philadelphia, relative to the importance of widening Walnut street, and also an ordinance to provide for the widening of Walnut street, and also an ordinance to provide for the widening of Walnut street, from Fifth to Twenty-second street, beg leave to report that

Walnut street, from the Delaware to Schuylkill Rivers was originally laid down as a 50 feet street.

By Ordinance October 22, 1888, authority was given to make the street 60 feet wide from river to river, and a plan so confirmed.

By Ordinance March 12, 1889, authority was given to revise Walnut street and such other streets affected, as to lines and grades of Walnut Street Bridge, from Twenty-second to Thirty-third streets, etc., and plans so confirmed.

So much opposition was shown to the 60 feet width as per Ordinance October 22, 1888, that steps were taken to reduce the width east of Fifth street, and finally resulted in the passage of the ordinance, approved March 7, 1890, whereby authority was given to revise the lines of Walnut street, from Delaware river to Twenty-second street, so as to make said

street 50 feet wide, and Plan No. 308 was advertised as to that part covering this street, and a hearing (at which there was no opposition) duly held.

The buildings on Walnut street east of Fifth street are mostly on the old street line, and many of them of modern construction. West of Fifth street there is no uniformity as to any line, so that it would seem to be impossible to fix an arbitrary width for the entire distance, provided for in the ordinance, without seriously affecting many buildings in each block, and while providing for many to recede would also allow many others to advance; in the course of time, as these improvements were going on singly, there would seem to be no fixed line apparent until they had all in one square undergone this transition. In other cases, where the buildings are now on the old line, and it was the intention of one owner to improve, he would be required to recede 5 feet to his great injury, while other buildings in the same block might be allowed to remain for an indefinite period in their old position; in this way the widening as proposed would utterly fail to accomplish the desired result; improvements retarded and the widening postponed indefinitely.

Your Committee is therefore of the opinion that each square should have its width of street fixed independently of each other, and to suit the buildings so far as may be possible, as they are now erected.

In a block where the travel is crowded, as between Eighth and Ninth, the lines might be fixed of the 60 feet width, so that when necessary the whole square can be forced back to the line at one time; to attempt to accomplish this by requiring singly each improvement as made to recede, might work great injustice to some, depreciate the value of properties, and the desired improvement postponed; in this case it might be provided that in a single block, where the present buildings on either side are on the old line, that they shall not be required to recede, only when the street on either side shall be widened for its entire block distance.

We therefore return the ordinance with a favorable recommendation.

Thomas L. Hicks (*Ch'n*), Jos. M. Adams, M. S. Apple, D. C. Cleaver, Louis Moore, Jacob J. Seeds, W. H. James, Hiram A. Miller, J. F. Henderson, John H. Baizley, A. Kin-kaid, Wm. B. Souder, Isaac D. Hetzell.

AN ORDINANCE

To provide for the widening of Walnut street, from Fifth to Twenty-second street.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That the Department of Public Works, Bureau of Surveys be, and is hereby authorized to revise the City plan, so as to make the width of Walnut street from Fifth to Twenty-second street such as shall conform with the buildings thereon erected, as the same may be deemed practicable; such width to be uniform in each block.

SECT. 2. After the confirmation and establishment of said lines, it shall not be lawful for any owner or builder to erect any new building, or to rebuild or alter the front or add to the height of any building now erected, without making it recede so as to conform to the line established, except as hereinafter provided.

SECT. 3. *Provided*, That whenever it shall be deemed advisable to widen such street in any square where the buildings are now on the old line thereof on one or both sides of said street, or where any owner or owners fronting thereon shall desire to improve or erect a new building, then, on application of such owner or owners, legal proceedings shall be taken to set all the buildings on that side back to the established line, and extending for the entire length of block.

APPENDIX No. 137.

Philadelphia, June 9, 1892.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN :—We, your Committee on Surveys, to whom was referred the bill entitled “An Ordinance to strike from the City plan Sylvan street, from Thirty-eighth to Fortieth street, and to place on the City plan in lieu thereof Wyalusing street, from Thirty-eighth to Fortieth street, and to revise the lines of Pennsgrove street, between Thirty-eighth and Fortieth streets, Twenty-fourth Ward, and to make the necessary revision of

grades," beg leave to report, that at the present time one street now built upon is within a few feet of another street on the City plan. The intention of the ordinance is to arrange the streets so as to cut the ground to advantage both to the city and the property owners. There can be no possible damage to anyone. We therefore report the ordinance and ask that it may pass Councils.

Thomas L. Hicks (*Ch'n*), Jos. M. Adams, M. S. Apple, D. C. Cleaver, L. W. Moore, Jacob J. Seeds, W. H. James, Hiram A. Miller, John H. Baizley, A. Kinkaid, Wm. B. Souder, Isaac D. Hetzell, J. F. Henderson.

GENTLEMEN :—We, your Committee on Surveys, to whom was referred bill entitled "An ordinance to strike Lippincott

street, from American street to the west side of Fourth street, from the City plan," beg leave to report the street as now on the City plan is in the midst of a network of railroad tracks, and if opened would be of no practicable use to anyone, and would create dangerous grade crossings. The only use of the street was for the purpose of drainage. The proviso attached secures the necessary sewer, which supplies all the needs of the City. We therefore report the ordinance with a favorable recommendation.

Thomas L. Hicks (*Ch'n*), Jos. M. Adams, M. S. Apple, D. C. Cleaver, L. W. Moore, Jacob J. Seeds, W. H. James, Hiram A. Miller, J. F. Henderson, John H. Baizley, A. Kinkaid, Wm. B. Souder, Isaac D. Hetzell.

LAW DEPARTMENT.

Philadelphia, June 14, 1892.

THOMAS L. HICKS, ESQ.

DEAR SIR :—I enclose herewith an ordinance which has the endorsement of this Department. In view of the fact that a jury to assess the damages is now sitting, we would like to have the ordinance passed before Councils adjourn. That you may understand the matter, permit me to state the following facts:

On December 26, 1890, an ordinance was approved for the revision of the grade of Columbia avenue so as to cross the Reading Railroad overhead. The change of grade of Columbia avenue necessitated changes on Hutchinson, Darien, and Ninth streets, north and south of Columbia avenue. The Board of Surveyors revised the lines and grades of all the cross streets to conform to Columbia avenue, and the railroad company are now making the changes on those cross streets. The ordinance of Councils in terms does not authorize that to be done, but when the bond was given to the city by the railroad company, Mayor Fitler refused to sign it until the railroad company bound itself to pay all damages caused by the necessary changes of the cross streets, and that was included in the bond and agreement.

Viewers have been appointed to assess the damages. We do not desire to proceed with the matter, as the question of municipal authority may be raised, unless the enclosed ordinance be passed.

As the matter has already been before the Board of Surveyors, you would be safe in having the ordinance passed without any further reference.

We consider that it is in the interest of the city, and also the property owners damaged, that the ordinance should be speedily passed.

If you desire any further information, please let me know, and I will gladly give it to you.

Yours very truly,

JAMES ALCORN,

Assistant City Solicitor.

—

AN ORDINANCE

To declare the meaning of the ordinance approved December 26, 1890, relating to the construction of the railroad of the Philadelphia and Reading Terminal Railroad Company, and to authorize the revision of the lines and grades of Hutchinson, Darien and Ninth streets and to authorize the grading of the said streets.

WHEREAS, By ordinance of Councils approved the twenty-sixth day of December, 1890, it was enacted among other things, as follows :

SECTION 8. The Department of Public Works is hereby directed and authorized to revise the grade of Columbia avenue at or near the point where the same crosses the line of the Philadelphia, Germantown and Norristown Railroad, and to revise the grades of Broad street and Lehigh avenue at or near the place where the said streets cross the line of the Philadelphia, Germantown and Norristown Railroad, so that said streets shall be carried over the line of the said railroad, and to revise the grade of Broad street at or near Pennsylvania avenue, where Broad street crosses the line of the Philadelphia and Reading Railroad Company, so that Broad street

can be carried over the said railroad. Said changes of grade after said revision, shall be made by said department; *Provided*, That all expenses and damages incidental thereto shall be paid by said railroad company, which shall hold the City of Philadelphia indemnified against the same.

AND, WHEREAS, The said change of grade of Columbia avenue required the change of grade of Hutchinson street, Ninth street and Darien street which said streets intersect Columbia avenue, and the plans prepared by the Department of Public Works, through the Bureau of Surveys, and which plans have been duly confirmed by said Board, provided for the change of grade of Hutchinson street, Ninth street, Darien street, and the bond given by said Railroad Company to indemnify the City of Philadelphia for damages arising by said reason of change of grade as provided by said ordinance, binds the said Philadelphia and Reading Railroad Company to pay all damages arising from the change of grade of said Hutchinson street, Ninth street and Darien street as well as of Columbia avenue.

AND, WHEREAS, It was the intention of the said ordinance to authorize and direct the Department of Public Works to revise the lines and grades of Hutchinson street, Darien street and Ninth street to conform to the changes of grade of Columbia avenue, and to authorize and empower the said Department of Public Works to make the necessary change of grade of the said Hutchinson street, Darien street and Ninth street, therefore,

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That the plans heretofore made by the Department of Public Works, through the Board of Surveys, and duly confirmed by them, providing for the change of grade of Hutchinson street, Ninth street and Darien street north and south of Columbia avenue, be, and the same are hereby approved, ratified and confirmed, and said Department of Public Works is hereby authorized and directed to make the said change of grade of said streets as provided by said confirmed plans; *Provided*, That all expenses and damages incident thereto, shall be paid by said railroad company, which shall hold the City of Philadelphia indemnified against the same.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN:—We, your Committee on Surveys, to whom was referred the accompanying ordinance to amend ordinance to place Durfer, Fifty-first, Fifty-first-and-a-half, Levering, and Pentridge streets on the City plan, approved June 22, 1891, beg leave to report that the only portion of Pentridge street not now dedicated is a place forty-five feet long, west of Fiftieth street. For some reason the owners of this ground will not dedicate, thus preventing the placing of the street on the plan. The damage, if any, will be so small that it is to the interest of this section to pass the bill. We therefore report with a favorable recommendation.

Thomas L. Hicks (*Ch'n*), Hiram A. Miller, A. Kinkaid, D. C. Cleaver, Wm. Horrocks, W. M. Geary, Wm. P. Becker, Frank A. Gilbert, Wm. G. Rutherford, Jos. M. Adams, F. A. Ballinger, M. S. Apple, John Morrison, J. Emory Byram, John H. Baizley.

AN ORDINANCE

To amend ordinance to place Durfer, Fifty-first, Fifty-one-and-one-half, Levering, and Pentridge streets on the City plan, approved June 22, 1891.

SECTION 1. *The Select and Common Councils of the City of Philadelphia do ordain*, That the Ordinance entitled "An Ordinance to place Durfer, Fifty-first, Fifty-one-and-one-half, Levering, and Pentridge streets on the City plan," approved June 22, 1891, be altered and amended by inserting between the words "streets" and "shall" the words "except on Pentridge street," so that the said ordinance shall read: "That the owners of the said streets, except on Pentridge street, shall first dedicate the same as public highways."

No additional appropriation is needed to this Bureau, but a transfer, amounting to \$4,156, can be made as stated in detail in another portion of this report.

Bureau of Surveys.

The estimated cost of branch sewers already ordered by ordinances of Councils is.....	\$74,000 00

The foregoing statement is based upon work ordered by ordinances of Councils already passed. If any other work, either in new paving or grading of streets, or in building branch sewers, is contemplated by the passage of any ordinance now pending, the appropriations needed will have to be increased in proportion to the estimated cost of the work included in the ordinances to be passed.

Yours, very respectfully,
JAS. H. WINDRIM,
Director.

ABRAHAM M. BEITLER, ESQ.,

Director Department of Public Safety.

DEAR SIR:—I am directed by the Board of Health to transmit to you the following copy of resolution passed this date, and request that it be transmitted to Councils.

Resolved, That City Councils be respectfully but urgently requested, as a sanitary necessity, to provide for the construction of a sewer on Walden street, between Twenty-first and Twenty-second streets.

APPENDIX No. 159.

OFFICE OF THE MAYOR.

Philadelphia, September 1, 1892.

To the Presidents and Members of Select and
Common Councils of the City of Philadelphia.

GENTLEMEN:—I have the honor to herewith transmit a communication from James H. Windrim, Director of the Department of Public Works, concerning the matter of the protection of the improved paving on Broad street. When the City shall have completed the present improvement of Broad street (for which she pays the total cost) it will be one of the finest streets in this country, but unless some immediate action is taken upon the accompanying recommendations of the Director of the Department of Public Works, this street will be subjected to much unnecessary wear and tear, and for this the City will receive no adequate return. I most heartily approve of the suggestions of the Director of the Department of Public Works, and recommend to your earnest consideration the desirability of such legislation as will prevent the destruction of our streets or will provide an adequate return

for the use of the streets, either by these various companies being compelled to bear their proportionate share of the expense of keeping in proper repair the streets they use, or to pay a license charge in sufficient amount to reimburse the City for maintaining them.

I am respectfully,

EDWIN S. STUART,

Mayor.

—

DEPARTMENT OF PUBLIC WORKS.

Philadelphia, August 31, 1892.

HON. EDWIN S. STUART,

Mayor of Philadelphia.

DEAR SIR:—The City will have expended during 1892, for the repaving of Broad street, the sum of \$204,643.62. The matter of the protection of this street from vehicles for specific traffic, which tends to destroy it, I consider of sufficient importance to request that you ask the attention of the Honorable Bodies of Councils, when they convene, that legislation be enacted to prevent damage to this street by the omnibus line.

The road laws of England provide, that all vehicles where the load per wheel is one-half to three-quarters ton the tire shall not be less than three inches; where the load is three-quarters to one ton per wheel, the tire shall not be less than six inches; if the vehicle has springs, the width of the tire may be one inch less.

In the general road laws it is provided that all vehicles weighing 672 pounds (8 cwt.) the tire shall not be less than four inches; and for all vehicles drawn by more than three horses the width of tire shall not be less than six inches.

The omnibuses running on Broad street have an average load of about one and one-half tons on each wheel, with a width of tire of two and one-half inches only.

For the proper care of roads and economy in their maintenance, the cities of England and the Continent regulate the width of the surface of the wheel bearing upon the road, relative to the load upon the vehicle, and fix the width of tire for

the wheels accordingly ; by this regulation vehicles carrying a load per wheel that is upon the omnibuses now running upon Broad street, would require tires not less than five inches in width, and thus distribute the load over twice the surface that is now covered by the wheels of these vehicles, and would diminish proportionately the wear and tear upon the pavement.

The damages to the street paving by the Omnibus Company General, upon the streets upon which its travel was diverted during the progress of the repaving of Broad street, in the period of fourteen days, have covered 16,635 square yards ; 896 linear feet of crossing stone were broken and displaced, and the covers of manholes of sewers, and of stop boxes on the City's gas and water mains were upset, making an aggregate damage of about \$6,000.00 to paved streets in this limited period of time.

I would recommend the passage of an ordinance regulating, first, that on and after January 1, 1893, the tires of the wheels of omnibuses and vehicles drawn by three or more horses, using asphaltum paved streets, shall not be less than five inches in width ; second, that omnibuses and other vehicles, authorized by ordinance with the special privilege of running upon asphaltum paved streets, shall pay to the City an annual license fee for their vehicles sufficient to maintain the streets they run upon in thorough repair

Yours very respectfully,

JAMES H. WINDRIM,

Director.

OFFICE OF THE MAYOR.

Philadelphia, September 1, 1892.

To the Select and Common Councils
of the City of Philadelphia.

GENTLEMEN :—I have the honor to herewith transmit a communication from Abraham M. Beitler, Director of the Department of Public Safety, forwarding a copy of a Resolution of the Board of Health requesting an additional appropriation of fifty thousand (50,000) dollars to the Department

of Public Safety, Bureau of Health, to defray the expenses of precautionary measures necessary to prevent the introduction of Asiatic Cholera into this City.

The Department of Public Safety has been doing all that was possible, with the means at its disposal, to provide safeguards to the health of our community, and while there is no cause for any unnecessary alarm on the part of our citizens at this time, it is still the part of prudence to adopt every means in our power to prevent, if possible, the disease from obtaining even a slight foothold here. I therefore urge upon your Honorable Bodies the great importance of promptly granting the appropriation requested, in order that the Department of Public Safety may not be hampered in its work through any lack of funds.

I am respectfully,

EDWIN S. STUART,

Mayor.

ABRAHAM M. BEITLER, ESQ.,

Director of the Department of Public Safety.

DEAR SIR:—I am directed by the Board of Health to

transmit to you the following copy of Preamble and Resolutions passed this date, and request that they be transmitted to Councils.

Yours respectfully,

WILLIAM P. TROTH,

Chief Clerk.

WHEREAS, The City and country is in great danger from the threatened introduction of Asiatic cholera, and prompt and efficient preparation is required to meet, ward off, and possibly to combat the disease, which will necessitate a large expenditure of money, therefore

Resolved, That City Councils be respectfully requested to make an extra appropriation to the Department of Public Safety, Bureau of Health, of fifty thousand (50,000) dollars, for extraordinary expenses incurred in the prevention, restriction, or suppression of cholera, and that the City Controller be directed to countersign warrants drawn against this item when signed by the Director of Public Safety, President and Secretary of the Board of Health, and the proper committee thereof.

Resolved, That the Board of Health be authorized to proceed forthwith with their preparations, that no valuable time be lost.

APPENDIX No. 162.

DEPARTMENT OF CITY CONTROLLER, CITY HALL.

Philadelphia, May 26, 1892.

To the Presidents and Members of Select and
Common Councils of the City of Philadelphia.

GENTLEMEN :—In compliance with the requirements of the law, I have the honor to submit the annual detailed statement of the estimated receipts, expenditures, assets and liabilities of the City for the five months from August 1, 1892, to December 31, 1892, and for the next fiscal year commencing January 1, 1893.

Expenses and Lawful Obligations.

The total estimated expenses of the City for the year 1893 amounts to \$28,708,620.57. This includes the lawful obligations, which aggregate \$4,596,740.00, and which must be deducted before the appropriations can be considered. The balance of this amount, \$25,111,880.57, represents the requirements of the various Departments and Bureaus, and shows an increase over that appropriated for 1892 of \$7,357,727.81.

Suspended Bank Balances.

In the statement forwarded September 1, 1891, I reported that I deemed it advisable to charge as a liability the balances in the suspended Keystone and Spring Garden National Banks. Since the close of the year, however, the city has received two dividends of ten per cent. each from the Spring Garden National Bank, amounting to \$29,680.45, which amount has been appropriated by ordinance for the extraordinary pressing needs of the Departments. The balances in the two banks, amounting to \$556,276.12, are still considered as a liability, for the reason that they are carried in the cash balance of the assets, where they must remain until ordinances are passed giving the requisite authority to strike them from the books.

Overdue State Moneys.

No settlement has been made by the State authorities in the case of certain claims due for the collection of personal property tax and school moneys of which you have been

advised. These matters are receiving the attention of our Law Department, and no doubt a satisfactory adjustment may be reached in the near future.

Mandamuses.

The estimated amounts for mandamus executions for 1891 were \$350,000, but the amount drawn from the treasury to August 1, 1892, was \$396,422.07.

I have therefore considered it advisable to set aside an additional sum for the balance of the year amounting to \$150,000, and have also estimated the amount required to meet mandamus executions for 1893 at \$600,000, being the largest sum ever reserved for this purpose. I am persuaded that the amount actually required for 1893 will even exceed that set aside, for the reason that the judgments to be entered against the City for damages for the taking of Schuetzen Park as a water reservoir, as well as in the opening of streets and changing of grades, will all probably be paid by mandamus.

The interest and costs charged the City in the payment of the many writs by mandamus, for the year, amounts in the aggregate to a large sum of money, and suggests the advisability of your considerate attention in favor of additional legislation to meet this drain upon the treasury.

Liquor Licenses.

The estimate of the number of liquor licenses that will be granted in 1893 has been fixed at 1,300, as against 1,383 granted in 1892. An underestimate deemed at once desirable and expedient in considering an economical administration of the finances, and the satisfaction which must ensue therefrom from a favorable showing of the City's affairs at the close of the year.

Valuation of Taxable Property.

The valuation of the real estate for taxable purposes, as furnished by the Department of Revision of Taxes in 1892, shows an increase over that of 1891 of \$17,066,610, a falling off of nearly \$5,000,000 as compared with the years 1891 and 1890.

Tax Rate.

The amount needed to furnish the City departments with the appropriations asked for would necessitate a tax rate of \$2.71 per \$100 upon the present valuation. I feel justified, however, in recommending to your Honorable Bodies the retention of the present rate of \$1.85, in view of the very favorable statement herewith presented, showing, as it does, such a large excess subject to appropriation over that of 1892.

I recognize also the fact that certain improvements are demanded in the rapid growth of our City, yet am constrained to advise against adding to the present rate except for the plainest and most urgent reasons.

Should a change, however, in the rate be decided upon, the increased revenue derived therefrom should be set aside for a specific purpose towards the improvements desired, and it clearly stated as to how the money should be expended.

The following summary of the receipts as estimated for the year 1893 is herewith submitted :

Assets and Liabilities.

A comparison of the assets and liabilities for the five months ending December 31, 1892, exhibits an estimated surplus of \$854,076.73.

From this has been set aside the sum of \$109,937.07 due by the State for the collection of the tax on personal property in 1890, now in litigation, and the sum of \$89,260.46 intended for appropriation prior to December 31, 1892.

The balance, amounting to \$654,879.20, has been added to the amount subject to appropriation of \$19,126,406.62, making the total estimated available for this purpose, \$19,781,285.82, an increase over the amount appropriated for 1892 of \$1,731,839.88, in all *exceeding* a tax rate of 2 per cent. upon the present valuation.

This gratifying exhibit, although falling below the amount required to meet the increased demands of the Departments, is a cause of congratulation, from the fact that in the statement prepared and submitted by this Department one year ago a deficit was found to exist which it was deemed prudent to provide for by first deducting it from the amount reported, subject to appropriation.

Funded Debt.

I beg to call your attention to a reduction of the funded debt of the City during the coming year by the redemption of loans amounting to \$1,023,100, and a corresponding reduction of interest thereon.

Also, to the new items of receipts embracing interest by the banks on city deposits, City Treasurer's Commissions returned to treasury, and dividend by the Sunbury and Erie Railroad on stock owned by the City, aggregating \$105,906.32.

I would respectfully urge upon your Honorable Bodies the importance of providing for the commencement of the work upon City improvements, such as paving, sewers, water and gas extensions, school-houses, etc., at an earlier date in the year than has been the custom in the past, in order that the Heads of Departments may advertise and prepare for the work in the early Spring, and avoid a loss of time during the months when this character of work can be successfully prosecuted. It would also obviate the necessity of carrying large balances in the banks to the credit of the City, the extraordinary size of which has excited some comment.

In presenting this report, I beg to add that it should be distinctly borne in mind that the figures are to a great extent based upon estimates, and that the actual results to be found at the end of the year may exhibit a material alteration from those shown herein.

Very respectfully,

Your obedient servant,

THOMAS M. THOMPSON,

City Controller.

To the Select and Common Councils

GENTLEMEN :—I have the honor to herewith transmit for your consideration a communication, which has my approval, from Abraham M. I am, respectfully,

—

DEPARTMENT OF PUBLIC SAFETY.

Philadelphia, September 15, 1892.

EDWIN S. STUART,
Mayor of Philadelphia.

DEAR SIR :—I have received a letter from the Chief of the Bureau of City Property, advising me that the Public Building Commissioners have completed the fitting up and furnishing of additional rooms on the sixth floor, City Hall, for the Criminal Court, and that the rooms are now completed. The Chief adds that the number of cleaners of courts on this floor has been too small for some time, and that the present force cannot attend to the additional work incident to the new court rooms.

Nothing is so essential as that these rooms, in which large numbers of people congregate, should be kept clean.

I would request that you communicate with Councils, asking them to appropriate for these three additional cleaners, at

the rate of fifty dollars per month, for the balance of this year.

Yours, very truly,

ABRAHAM M. BEITLER,
Director.

GENTLEMEN:—I have the honor to herewith transmit for your consideration a communication from Jas. H. Windrim, Director of the Department of Public Works, concerning a communication from Abraham M. Beitler, Director of the Department of Public Safety, forwarding a resolution to the Board of Health relative to the condition of the paving and the gutters in the streets in the First Highway District. These several communications have my approval; the recommendation of the Department of Public Works, that these minor streets and gutters be repaired by repaving with sheet asphaltum, meets my hearty endorsement from both a sanitary and economical point of view.

In connection with his statement of the already exhausted condition of the appropriation which otherwise would be available for this work, I desire most earnestly to call to your immediate attention the fact that not only in this item but also in the items for branch sewers and for grading of streets, the original appropriations have long since been exhausted by the passage of ordinances directing work which requires an amount of money far in excess of the original appropriation, many of which ordinances are practically useless unless there be additional appropriations made to equal the amount they require for work they direct; and therefore, in view of these facts and the further facts that no work under such ordinances can be otherwise undertaken by the Department, I respectfully recommend sufficient additional appropriations to these items, and the passage of no ordinances for such work, unless

there be in the same ordinances appropriations sufficient for the work that may therein be directed, as it is but useless, unless you provide the required money, to direct any work for which there is no money in the Department available.

I am, respectfully,

EDWIN S. STUART,
Mayor.

DEPARTMENT OF PUBLIC WORKS.

Philadelphia, Sept 15, 1892.

HON. EDWIN S. STUART,

Mayor of Philadelphia.

DEAR SIR:—I am in receipt of a letter, through the Director of the Department of Public Safety, from the Board of Health, directing the attention of this department to the condition of the paving and the gutters in the streets of the district in which the board is now engaged in making house to house inspection, between Pine street and Washington avenue, and Tenth and Front streets.

The money allotted for expenditure in the First Highway District, which covers the above location, was \$10,000, which has been judiciously expended in making repairs of the character referred to in the complaint. In the matter of repairs to paved streets, the department asked proposals for this work at a fixed price for each district; the lowest bid received amounted to \$200,000, and the allotment of the appropriation for this work during the present year, at a rate per square yard, was only \$64,000.

The statement that the streets and gutters in the locality complained of are in a broken and defective condition is true, especially in connection with the smaller streets, and to repair them with like materials with which they are paved would be very unsatisfactory and not of permanent benefit.

I would recommend that these minor streets be repaved with sheet asphaltum, which would be money well expended, giving a street surface which would not retain or absorb offensive moisture, and proving, as a sanitary measure, most desirable in this densely populated district.

To do this repaving, and place the necessary drainage in the streets, would require a special appropriation of \$50,000. There is not available, in the appropriations to this department, any money which may be transferred to do this work, but, as a fact, ordinances of Councils have been passed making it obligatory upon this department to repave streets very largely in excess of the appropriation.

Enclosed please find copy of the letter of the Board of Health referred to above.

Yours, very respectfully,

JAS. H. WINDRIM,

Director.

BOARD OF HEALTH.

Philadelphia, September 14, 1892.

DEAR SIR:—At a meeting of the Board of Health held this day, the following request was passed: The attention of the Department of Public Works is respectfully called to the filthy condition of the gutters and ways on the public highways in the district in which we are now engaged in making house to house inspection, viz.: Pine street to Washington avenue, each from Tenth to Front streets, made so by the broken and defective condition of the paving, causing filthy water to accumulate and remain there stagnating and creating foul and offensive odors.

In this emergency, when strenuous efforts are being made to improve the sanitary condition of the city, some provision should be made, at least, to repair these foul water courses. The Board therefore requests the Director of Public Works, as a sanitary precaution, to place the filthy water courses in this section, more especially South to Catharine, Ninth to Fifth, in repair.

Respectfully, etc.,

(Signed)

CHARLES F. KENNEDY,

Chief Inspector.

RESOLUTION

Granting the use of Common Council Chamber to the Philadelphia Exhibitor's Association of the World's Columbian Exposition, at Chicago, 1893.

Resolved, by the Common Council of the City of Philadelphia. That the use of Common Council Chamber be, and the same is hereby granted to the Philadelphia Exhibitor's Association, for the purpose of holding a meeting of the Association, on Friday, September 23 and 30, 1892.

APPENDIX No. 178.

RESOLUTION

Of request to the Board of Education to amend the action of its Normal School Committee, increasing the term of study, so that it shall not apply to the present Class A.

WHEREAS, The course of study prescribed by the Board of Education for the pupils of the Girls Normal School provides, that pupils graduating therefrom and attending the fourth year or post graduate course, shall be awarded Teacher's certificates on obtaining certain averages "for their work and scholarship during the said fourth year of the Normal School course," as fully set forth in Section 23 of the By-Laws of the Board, and

WHEREAS, Said prescribed course has been followed and certificates awarded as aforesaid for a number of years, and pupils have entered the Normal School relying upon said By-Law and its observance, which By-law was printed in the catalogue issued to the scholars of the Normal School as late as 1892, and the parents of pupils upon the faith of and relying upon the same have made their arrangements, and many assumed responsibilities, often onerous, to secure for their daughters the qualifications to teach, and

WHEREAS, On September 9, 1892, the pupils of Class A of the Normal School, composed of the fourth year students, were notified for the first time that they would be obliged to remain in said class two years if they desired to receive teacher's certificates, thus making the course in the school five years instead of four, and it appears that this increase of time was resolved upon by the Normal School Committee of the Board of Education since the close of the school term in the summer, but no notice whatever was given of said action to the scholars or the public prior to September 9, and after the students in Class A had entered upon the fourth year of the school's course, and the failure to give notice on a matter so material is contrary to all principles of equity or justice, therefore, it is

Resolved, by the Common Council of the City of Philadelphia, That while they do not desire to criticise the action of the Committee of the Board of Education in increasing the

term to two years in the post graduate course, they do, however, in justice to the scholars affected, respectfully request the Board of Education to so amend the action of their Committee so that it shall not apply to the present Class A of the Normal School, the students composing it having had no notice before entering said class.

DEPARTMENT OF PUBLIC SAFETY.

Philadelphia, September 27, 1892.

WENCEL HARTMAN, ESQ.,

President of Common Council.

DEAR SIR:—I send you herewith a copy of the report of the Quarantine Commission of the International Conference of State Boards of Health, dealing with the question of our Quarantine Station and its needs.

I send you this for two reasons: First, because it is impartial testimony from undoubted experts as to the efficiency of our Quarantine and its admirable location; secondly, because it points out at how little expense it can be made a modern and first-class station.

Yours, very truly,

ABRAHAM M. BEITLER,

Director.

REPORT OF THE QUARANTINE COMMISSION ON THE
DEFENCES AGAINST CHOLERA ALONG THE
DELAWARE BASIN.

The Quarantine Commission of the International Conference of State Boards of Health visited the stations of the Delaware basin on September 13th and 14th, and at the request of the State Board of Health of Pennsylvania and the Board of Health of Philadelphia, make the following preliminary report:

The important points involved in the protection of the Delaware basin are: First, the Government Quarantine Station at the Delaware Breakwater, one hundred miles below Philadelphia; second, the port Quarantine Station, or Lazaretto of Philadelphia; and third, the various local health authorities along the river.

1st. The Delaware Breakwater Station consists of a large administration building and residences for the officers, a small hospital of twenty-eight beds, tents for persons under observation and dining hall for their use, and two or three smaller buildings for bath and cleansing purposes.

The hospital was not in good condition for the reception of patients, and the water supply is drawn from a shallow pipe-well driven into the sand under the hospital building. The attached kitchen obtains its water supply from a similar well under the building. The bath-room has no proper conveniences, ordinary tubs being used, while no adequate water supply is readily available. There are no water closets, and the privies are objectionable. The station consists of a part of main shore, of about twelve hundred feet square, and persons under observation could be quarantined only by sentries detailed for the work.

A mile outside and in front of the station is a Government breakwater, with enough water inside it for ships and schooners, but heavy draught vessels have to lie in the exposed offing at a point where the bay is twelve miles across, and exposed to the violence of storms from the ocean.

For boarding these vessels there is a revenue cutter and a smaller vessel, the "Pasteur," the latter fitted up with sulphur dioxide furnace and a tank with disinfecting solutions, for use in disinfecting ships and cargo. At the time of the visit this vessel was out of repair and not available for use, and at any

time when the water is rough it cannot be used alongside of ships anchored outside.

To the west of the breakwater is an iron pier, having from twenty to twenty-five feet of water. This pier could be utilized for placing thereon a disinfecting plant for use in small vessels. For larger vessels, baggage and effects would have to be brought for disinfection to the pier in a "lighter." The pier is not on the quarantine grounds and is not available for present use, the War Department having jurisdiction. At present the vessels, as the "Ohio," are detained in the offing, and baggage, ship and cargo are disinfected only by the ship's steam. This is to be supplemented shortly by a barge now at Philadelphia, which is fitted up with a steam disinfecting chamber for baggage. The chamber is well calculated for the work, but the Commission fears that the barge cannot be made available for use alongside vessels in rough weather. Owing to the exposed condition of the anchorage, and the impossibility of a deep water wharf being constructed, the Commission does not consider the station as being well chosen, since it cannot be made available at all times for rapid and effective work.

2d. The Philadelphia Quarantine Station or Lazaretto, situated eight miles below the city, on a shore of *made* land, thoroughly underdrained. The main building was begun in 1799. The tract, enclosed with a high fence, consists of ten acres, with an adjoining ten acres of Government land at the disposal of the authorities. Buildings have sprung up as residences on land adjoining the station, and hence it is desirable that a new island station in the river be secured. This is, fortunately, present in mid-channel, just opposite the present station. The island is ample in extent, and without great expense can be made as dry and healthful as the present station. With the exception of the proximity to residences, rendering constant surveillance of "suspects" detained there necessary, the Lazaretto seems equipped to a degree greatly exceeding that of any other station visited, for the treatment of the sick, the isolation of "suspects," and for the disinfection of baggage and other effects.

As yet the disinfection of vessels and cargo is not provided for except by the ordinary method by ship's steam.

The station proper has an administration building and residence for stewards, etc., a large kitchen, and contains also six

large, well-appointed wards to be used in emergency for the sick, and at other times for housing persons under observation. Everything in this building is regulated with that care seen in first-class city hospitals. Some two hundred yards from this is the hospital now used, which is well fitted up, and has kitchen, wash-room, etc., and capacity for forty patients. There is also another small building used in part as a disinfecting chamber by boiling water, and sulphur and chlorine fumigations, and in part as morgue.

At the shore is a small boat-house, with a barge for boarding, in case the steamer becomes temporarily disabled.

Along the shore to the right is a newly-completed steam-disinfecting room, sixteen feet square, with boiler attached. A temperature of 216° F. is obtained, while with contemplated improvements a higher degree may be possible. This was constructed within a week, and must be considered as a temporary substitute for a steel disinfecting plant.

A large stone warehouse belonging to the Government is also utilized by means of pots, for sulphur fumigation, the baggage being placed in wire baskets, several hundreds of which are on hand. The water supply of the station is excellent, being obtained by an artesian well three hundred feet deep, in an isolated position, and is pumped to an iron tank at the top of the building. Some fifteen hundred gallons can be pumped hourly, and pipes are laid to all points, and water, under pressure, for fire and all other uses is always available. The pumping is done by hot-air engine. The bath tubs, water-closets, and sinks, all of modern pattern, are supplied in ample number, and are conducted to a carefully constructed system of sewerage. Large grass-plots are available for the erection of tents, several hundred of which are on hand. For inspection purposes the station is supplied with a small steamer, on which the Lazaretto physician visits vessels, whose arrival in the river is telegraphed up from the station of the Maritime Exchange at the Breakwater.

For cases where quarantine of detention and disinfection is deemed necessary, the station has just been provided with a so-called "Observation" steamer, the "Georgianna," having accommodation in state-rooms and temporary berths fitted up in the cabin for some five hundred persons. This vessel will run alongside of steamers and have removed to it steerage passengers, who, though healthy, may have been exposed to

Cholera on the voyage. They are to be detained during the incubation period of the disease, and close observation by the physician in charge will be kept up, and any sick will be removed therefrom to the hospital. While housing so many in such close quarters is not desirable, yet the scientific methods, which have been adopted to obviate any evil results arising therefrom, are most elaborate and complete. These consist of a room fifteen feet square in hold, fitted up with steam supply pipes for both dry and live steam, which can quickly, under pressure, be brought to the temperature of 230° F. Into this the wearing apparel of suspects is at once taken on their coming on board and disinfected, and returned to them after each has been bathed in hot water with disinfectants. The bath water can also be boiled in tanks. Two small fans, operated by steam, are being placed in position for the enforced ventilation of sleeping apartments and for the removal of the steam from the disinfecting chamber. Either side of the vessel is fitted up with bath-rooms, and, allowing fifteen minutes to each, some seventy-five persons per hour can be bathed, they being brought off from the ship in detachments as fast as they can be washed and their clothing disinfected. By this method of removal from the ship a minimum of infection will reach the observation vessel.

The most modern appliances for filtration and sterilization of drinking water have been fitted up, and are known as the "West" apparatus. By it river or other water is pumped into a reserve tank of one hundred and fifty gallon capacity, whence it is, under pressure, forced through a new charcoal filter, after which it passes into a sterilizer, which is a small steel cylinder so constructed that by an automatic mercury valve arrangement the water is subjected in an inner galvanized tube to steam at 230° F., or higher if necessary, and thence, with its contained gases, passed on through galvanized iron pipe cooled in coils placed in the deck water-tank, and thereafter drunk from faucets in the protected refrigerator ice boxes. Either side of the vessel is fitted up with separate latrines and urinals. The latrines are of modern make and supplied with a disinfecting solution, all excreta being subjected to it. These rooms are under the constant supervision of attendants, instructed to observe any evidence of diarrhoea in "suspects." The kitchen is supplied with three large steam cookers, suited for the work; while steam heated water is laid on for washing dishes, etc. Pipes are laid and two hundred

feet of hose supplied, so that decks can be steam-washed, as also the holds of infected vessels. An electric lighting plant is supplied over the whole ship.

3d. The City organization of health for Philadelphia is established on a broad basis as a department under the Director of Public Safety. As the Director has under him other departments, as police, fire, etc., he is situated peculiarly well for supplying special aid, in times of emergency as the present, to the Health Bureau by utilizing the police and officers of other services. The service at present consists of the Mayor and Director of Public Safety, both of whom are, *ex officio*, members of the Board of Health, which is made up with five additional members appointed by the Mayor. The Board meets daily part of the year, and receives reports and gives direction to the sub-heads, who are under the general direction of the Health Officers and Medical Inspector. There are also nineteen assistant medical inspectors, twenty-four nuisance inspectors under a chief, the disinfecting corps under a chief. The executive officer of the Board is the health officer appointed by the Governor. In addition to these the Director has detailed the whole police force, some two thousand men in all, to act as sanitary inspectors in the twenty-nine precincts.

In addition to this organization the Board has its isolation or Municipal Hospital of some two hundred beds, situated at a point in the City convenient to access. Notification of contagious disease is compulsory, and the Board can isolate in hospital all dangerous cases. The Lazaretto or Port Quarantine Station, with its staff, is a branch of this City Health service, and is placed under a Committee of the Board of Health, being connected with the Health Office by telephone, and as closely scrutinized as if in the City.

While the value of any system for the public health work must be judged wholly by results, yet it is proper to say that the Commission is cognizant of practical results in various directions which attest in some degree to the quality of the Philadelphia health service. Its plans are based upon a comprehension of the broad principles of sanitation, and these principles are being carried into effect through the adoption of scientific methods in details. The prompt concentration of forces to defend immediately vulnerable points and a homogeneous organization operated by a capable general director are visible on every hand. It is with much pleasure that the

Commission is enabled to say, after careful inquiry, that to Philadelphia at least the Continent may confidently look for protection against the importation of cholera, so far as she can control its entry, by way of the Delaware basin, and for limiting its spread within her own borders, should it unfortunately find its way into the City through other channels.

As additional equipments to the station the Commission would summarize its needs, already incidentally referred to, as follows :

(a) The immediate purchase of the island adjacent to the station, or any other equally suitable and available, to be fitted up as a permanent quarantine station, not only for Philadelphia, but also for the whole Delaware Basin.

(b) That this permanent station be supplied with a deep water wharf, on which sulphur dioxide disinfecting furnaces, elevated tanks for disinfecting solutions, steel cylinders for disinfecting by super-heated steam and other necessary appliances, may be placed for disinfecting ships and their contents, the ship being brought alongside the wharf.

(c) That, as soon as the island be properly reclaimed and drained, commodious buildings for hospital purposes and for the detention of "suspects" from ships be constructed.

(d) That the present station be maintained as officers quarters and a supply station.

(e) That in view of immediate necessities the Commission suggests that the Marine Hospital Service be requested to station the disinfecting steamer "Pasteur" near Lazaretto, so that ships may be treated by sulphur dioxide disinfection during all weather. The commission was :
